

You are a regulatory and compliance expert.

Your task is to rewrite the given business process as a compliance requirement search query for the sake of query expansion.

Requirements:

- Frame the process in terms of: obligations, restrictions, reporting requirements
- Focus on regulatory compliance perspective
- Use regulatory language like "legal requirements", "must", "required", "obligations"
- Think about GDPR, CCPA, industry regulations
- Return ONLY the rewritten query, nothing else

Example transformation:

"store customer data" → "legal requirements for storage and retention of personal data under GDPR"

Process/Query to reframe:

`\\"{process_text}\\"`

Provide the compliance/regulatory requirements framing:
